Ms. Olívia Mičeková

born on 03.11.2004, participated in the project “Smart Home - innovative trends in vocational education” with the project number 2019-1-SK01-KA102-060452 from 23.08.2021 until 10.09.2021. The participant successfully completed the Networks internship.

The focus points of the internship were as follows:

- Plan, implement and optimise IT services within the IT infrastructure of a company
- Consider in the area of network, software and data security
- Operating systems and computer networks for set up, their structure is and how to administer them
- Methods used for the design and development of database applications and software systems
- Create overall concepts for SmartHome installations and install SmartHome networks
- Implementing software and user programmes in terms of programming
- Integrating programmes or parts of programmes into already existing IT systems
- Testing software components and IT application systems
- Supporting and maintaining existing systems
- Installing and configuring operating systems, networks and servers
- Preparing and performing installation for SmartHome setup

In addition, the participant was introduced to professional standard operating procedures and regulations as well as learning about health and safety measures and accident prevention.

As a professional and a team member, Olívia Mičeková has:

- A very good willingness to work enthusiastically with others, to seek clarification through questions, share resources and accept feedback and responsibility.
- An excellent willingness to listen, to share ideas with others, to speak with respect and curiosity and to adapt to the audience.
- An excellent willingness and ability to follow instructions and complete assigned tasks, to work independently and seek help when needed, to take initiative and to be able to reflect on and improve their work.
- A very good ability to see and describe a problem, to make connections with prior learning, collect and use evidence to understand a problem, a willingness to experiment with new techniques and approaches and an ability to review a solution and improve it.
- An excellent ability to be on time and prepared for work, to know and do what is right and fair, to work with a positive attitude toward continuous improvement and to respond well to feedback and constructive criticism.

We thank Olívia Mičeková for participating and wish them all the best and much success for their professional and personal future.

Mr. Daniel Korytár

born on 20.05.2003, participated in the project “Smart Home - innovative trends in vocational education” with the project number 2019-1-SK01-KA102-060452 from 23.08.2021 until 10.09.2021. The participant successfully completed the Networks internship.

The focus points of the internship were as follows:

- Plan, implement and optimise IT services within the IT infrastructure of a company
- Consider in the area of network, software and data security
- Operating systems and computer networks for set up, their structure is and how to administer them
- Methods used for the design and development of database applications and software systems
- Create overall concepts for SmartHome installations and install SmartHome networks
- Implementing software and user programmes in terms of programming
- Integrating programmes or parts of programmes into already existing IT systems
- Testing software components and IT application systems
- Supporting and maintaining existing systems
- Installing and configuring operating systems, networks and servers
- Preparing and performing installation for SmartHome setup

In addition, the participant was introduced to professional standard operating procedures and regulations as well as learning about health and safety measures and accident prevention.

As a professional and a team member, Daniel Korytár has:

- A very good willingness to work enthusiastically with others, to seek clarification through questions, share resources and accept feedback and responsibility.
- An excellent willingness to listen, to share ideas with others, to speak with respect and curiosity and to adapt to the audience.
- An excellent willingness and ability to follow instructions and complete assigned tasks, to work independently and seek help when needed, to take initiative and to be able to reflect on and improve their work.
- A very good ability to see and describe a problem, to make connections with prior learning, collect and use evidence to understand a problem, a willingness to experiment with new techniques and approaches and an ability to review a solution and improve it.
- An excellent ability to be on time and prepared for work, to know and do what is right and fair, to work with a positive attitude toward continuous improvement and to respond well to feedback and constructive criticism.

We thank Daniel Korytár for participating and wish them all the best and much success for their professional and personal future.

Mr. Lóránt Jarábek

born on 23.09.2002, participated in the project “Smart Home - innovative trends in vocational education” with the project number 2019-1-SK01-KA102-060452 from 23.08.2021 until 10.09.2021. The participant successfully completed the Networks internship.

The focus points of the internship were as follows:

- Plan, implement and optimise IT services within the IT infrastructure of a company
- Consider in the area of network, software and data security
- Operating systems and computer networks for set up, their structure is and how to administer them
- Methods used for the design and development of database applications and software systems
- Create overall concepts for SmartHome installations and install SmartHome networks
- Implementing software and user programmes in terms of programming
- Integrating programmes or parts of programmes into already existing IT systems
- Testing software components and IT application systems
- Supporting and maintaining existing systems
- Installing and configuring operating systems, networks and servers
- Preparing and performing installation for SmartHome setup

In addition, the participant was introduced to professional standard operating procedures and regulations as well as learning about health and safety measures and accident prevention.

As a professional and a team member, Lóránt Jarábek has:

- A very good willingness to work enthusiastically with others, to seek clarification through questions, share resources and accept feedback and responsibility.
- An excellent willingness to listen, to share ideas with others, to speak with respect and curiosity and to adapt to the audience.
- An excellent willingness and ability to follow instructions and complete assigned tasks, to work independently and seek help when needed, to take initiative and to be able to reflect on and improve their work.
- A very good ability to see and describe a problem, to make connections with prior learning, collect and use evidence to understand a problem, a willingness to experiment with new techniques and approaches and an ability to review a solution and improve it.
- An excellent ability to be on time and prepared for work, to know and do what is right and fair, to work with a positive attitude toward continuous improvement and to respond well to feedback and constructive criticism.

We thank Lóránt Jarábek for participating and wish them all the best and much success for their professional and personal future.
